

Furnio Furniture Marketplace

E-commerce Website

Day 4 : DYNAMIC FRONTEND COMPONENTS

components implemented on E-Commerce website

ADD TO CARD :

The **Add to Cart** functionality allows users to select and store items they wish to purchase while browsing through a product catalog. When a user clicks the "ADD TO CARD" button on a product page, the selected item is added to their cart.

DYNAMIC ROUTING :

Incorporating **dynamic routing** into the sofa website allows for a seamless and personalized user experience by dynamically rendering product details, such as individual sofa models, based on their unique identifiers. For example, when a user clicks on a specific sofa, the URL will dynamically update to reflect that particular product (e.g., /sofas/[id]), where [id] corresponds to the unique ID of the selected sofa. Using **Next.js**, dynamic routing is enabled by creating dynamic routes like [id].js, which allows fetching and displaying the details of the selected sofa, such as its image, price, description, and features

ADD COMMENT SECTION :

Adding a **comment section** to the sofa website enhances user engagement by allowing customers to share their thoughts, feedback, and experiences with a specific product. This feature provides potential buyers with valuable insights from previous customers, helping them make informed purchasing decisions.

SOCIAL LINKS :

Integrating **social media links** on the sofa website allows customers to easily connect with the brand on various platforms, enhancing visibility and fostering engagement. These links can direct users to the company's profiles on platforms like **Facebook, Instagram, Twitter,**

Pinterest, and **LinkedIn**, where they can follow updates, promotions, and new product releases.

Granite dining table with dining chair

★★★★★

\$ \$20

Dining table with six chairs and a centerpiece

Alpha Table

★★★★★

\$900 \$10

A sturdy oak chair with a sleek and minimalist design.
